About Soft Corner

Soft Corner was founded as a partnership firm in April 1996. We have two offices in Pune and currently have 40+ people in our team.

Historically, we have been business applications for companies in India, USA, UK and Scandinavia. However, in the last 10 years, we have developed a few products, which are doing well in the market.

We do not believe in growing by increasing the number of people in the company but by increasing per person revenue, each year. We are a team of 40 and ideally would not want to grow much larger in numbers. This is mainly because, with lesser number of people, it gives us the flexibility to say ‘No’ to projects that are not interesting or challenging. Running a tight ship also has another advantage - that the founders maintain a high technical involvement in all the projects.

Currently, eMerge® is our most popular product – which is used by our customers for financial consolidation and MIS reports like Budget vs Actual. We have some illustrious customers like Bank of India, Godrej, Marico, Lupin, Pepsico, Tata International, National Stock Exchange and even software companies like Persistent Systems, KPIT, Zensar, Hinduja Global Services etc. (close to a hundred large customers) – whose quarterly results are processed through eMerge. You can read more about it at www.emergeconsol.com

Last year, we developed another successful product called LeazeOn® (which is marketed under a company with the same name) for addressing the new leasing standard in accounting, both in IFRS and Ind-AS accounting practices. In the last year we have acquired more around 25 large customers like Godrej Consumer Products, Lupin, Apollo Hospitals, ITC, Kotak Mahindra Bank, Asian Paints, Nerolac etc. (www.leazeon.com)

ekspens – Is yet another product we have recently launched. A web and mobile based expense management product. We have implemented similar systems at Alfa Laval India, Alfa Laval South East (including Malaysia, Indonesia, Singapore and Vietnam) and SECO Tools. We have not marketed it very seriously and plan to do so soon.

eCompTrack – is a product in the pipeline. A web based tool to manage all your compliances and keep a repository of all the compliance documents of the entire group of companies with a dashboard view. This is in development and likely to finish into a polished product in next 6 months or so.

The thing that binds us together is - all of us in the company are passionate coders and we seriously enjoy coding!

For the past 4 years or so, Soft Corner has also been working for Non-profits like Shelter Associates, Motivation for Excellence etc. Since 2018, we have been also involved in the Tech4Dev initiative (under the Chintu Gudiya Foundation (www.chintugudiya.org) for developing open source software for NGOs in India.

Our website of Soft Corner seriously needs revamping and is under construction. A place holder website is available at www.soft-corner.com. You can take a look for what it is worth – but don’t say we did not warn you!
